6. Xcode Account and Signing

Because the Indian Apple ID is yours, use Xcode directly.

6.1 Add the Indian Apple ID to Xcode

1. Open Xcode.
2. In the menu bar, click Xcode.
3. Click Settings.
4. Click Accounts.
5. Click the plus button +.
6. Select Apple Account.
7. Click Continue.
8. Enter the Indian Apple ID.
9. Enter the password.
10. Complete 2FA.
11. Select the Indian Apple Developer team when it appears.
12. Close Settings.

6.2 Use Automatic Signing for First Attempt

1. Open Food App.xcodeproj.
2. In the Project Navigator, click the blue project icon Food App.
